Abraham Sanchez

Senior Unity Developer — Gameplay Systems, XR & Cross-Platform Games

abrahamgto@gmail.com · +52 464 654 0263 · Salamanca, Gto, Mexico · github.com/AbrahamSanchezDev

Portfolio: abrahamsanchezdev.github.io/abraham_sanchez_profile · linkedin.com/in/abraham-sanchez-f

PROFESSIONAL SUMMARY

Senior Unity Developer with 10+ years building gameplay systems and scalable architecture across PC, mobile (iOS/Android), WebGL and XR. Shipped two commercial titles on Steam, raised player retention by 5%+ on a high-traffic F2P mobile game, and led an XR team whose iOS AR app was nominated for the Unity Awards. Strong in procedural generation, behavior-tree AI, performance optimization and cross-platform delivery, from first prototype through live operations. Open to remote roles and relocation.

PROFESSIONAL EXPERIENCE

Alter Learning *Senior Software Engineer – Unity & XR (Contract)* Nov 2025 – Feb 2026

- Engineered a reusable VR integration framework that cut VR porting time by 40%+ across a 20+ app ecosystem (iOS, Android, PC, macOS, Meta Quest 3).
- Refactored core systems around SOLID and modular ScriptableObjects, reducing recurring defect reports by ~35%.
- Defined development standards and documentation that cut new-developer onboarding by ~30%.
- Optimized memory and performance across mobile, desktop and standalone VR.

Scopely *Senior Software Engineer – Unity Client* Jun 2024 – Aug 2025

- Shipped a new splash screen for WWE Champions that raised player retention by 5%+ on a high-traffic F2P mobile title.
- Reduced crash rates by 5% on Android and iOS through profiling and stability fixes (Unity Profiler, Android Studio, BugSnag).
- Built internal Unity tools for LiveOps and QA teams, improving cross-functional workflow efficiency.
- Integrated asset bundling and data-driven UI rendering for faster content delivery.

Amber Studio *Senior Software Engineer – Unity (Contract)* Jan 2024 – May 2024

- Engineered gameplay systems and interactive mechanics for F2P casino titles on Android, iOS and Facebook Games.
- Established the onboarding process for new developers, reducing ramp-up time.
- Expanded in-game reward engines and real-time asynchronous messaging; integrated monetization hooks and analytics.

PeakActivity *Software Engineer → Senior Software Engineer – Unity, Team Lead* Jul 2020 – Dec 2023

Subcontracted through Siono (Jul 2020 – Sep 2022), then contracted directly by PeakActivity and promoted to team lead (Oct 2022).

- Led Unity development of AR/VR applications for Meta Quest, Magic Leap, visionOS and WebGL.
- Built an iOS AR app nominated for the Unity Awards 2021, helping secure a strategic partnership with Unity and Magic Leap.
- Developed a Magic Leap 2 AR experience showcased at AWE.
- Integrated the ArcGIS Maps SDK for real-time geospatial VR; built an iOS LiDAR system that captures and renders point clouds.
- Architected cloud integrations connecting Unity clients to backend microservices via REST APIs.
- Delivered a WebGL virtual-assistant framework for holographic installations and VR training simulations.

The Capture Worlds *Creator & Lead Unity Developer — Steam release* Mar 2018 – Mar 2020

- Designed and developed a procedural open-world monster-capture RPG from concept to Steam release (80%+ positive reviews).

- Implemented deterministic procedural generation for quests and world spawning, plus real-time behavior-tree AI.
- Built custom object pooling and low-level memory allocation systems to cut runtime overhead.
- Managed Steam publishing, Workshop modding support, post-launch updates and AWS S3 storage.

Code Bullet *Lead Programmer – Unity* Jan 2017 – Feb 2018

- Turned a prototype into Landless, an open-world survival game released on Steam; led a team of 4.
- Designed a procedural asset-configuration system that automated the asset pipeline, saving over $50K in production costs; contributed design changes that drove first-year sales above $100K.
- Built behavior-tree AI and procedural open-world spawning; profiled and stabilized gameplay for a clean launch.

Independent Development *Software Developer – Unity* Feb 2015 – Dec 2016

- Self-directed Unity work alongside a non-games job: a real-time 3D combat RPG prototype (abilities, progression, NPC AI, object pooling).

Stoneworks Games *3D Artist & Junior Unity Developer (Freelance)* Feb 2013 – Jan 2015

- Built a procedural asset-combination system that scaled 40 assets into 4,800+ unique variations for Blood of Magic (PC, 2015).
- Developed an NPC generator that automated 80%+ of NPC creation in the final game; created 3D environments and characters.

TECHNICAL SKILLS

Game Development	Unity (3D/2D/URP), C#, ScriptableObjects, Addressables, Asset Bundles, UI Toolkit, Animation, Physics
Architecture	SOLID, MVC, Event-Driven, Dependency Injection (VContainer), Object Pooling, Modular Design
Gameplay & AI	Behavior Trees, Procedural Generation, Deterministic Systems, Gameplay Optimization
Platforms & XR	PC (Steam), iOS, Android, WebGL, AR Foundation, XR Interaction Toolkit, Meta Quest, Magic Leap, visionOS
Tools & Production	Git, GitHub, Bitbucket, Jira, Jenkins, CI/CD, Unity Profiler, BugSnag, Steamworks, PlayFab, NUnit
Web & Cloud	TypeScript, React, Next.js, Node.js, REST APIs, AWS S3, Firebase, Supabase
3D Pipeline	Blender, Maya, Substance Painter

EDUCATION

Universidad Tecnológica de Salamanca *Salamanca, Gto, Mexico*

- Engineering in Software Development and Management (Bachelor's) — completed Apr 2026
- A.S. in IT — Multiplatform Software Development (TSU) — completed Aug 2024

Languages: Spanish (Native) · English (Fluent, professional)
