PROFESSIONAL SUMMARY

Senior Unity Developer with 10+ years of experience building gameplay systems and scalable architecture across PC, mobile (iOS/Android), WebGL, and XR platforms. Proven track record of shipping commercial titles on Steam with 80%+ positive reviews, improving player retention by 5%+, and reducing production costs by over \$100K through automation. Expert in procedural generation, AI behavior trees, performance optimization, and cross-platform development. Full production lifecycle expertise from prototyping through live operations.

PROFESSIONAL EXPERIENCE

Alter Learning | *Senior Unity Developer (Contract)* | Nov 2025 - Feb 2026

- Designed reusable Unity frameworks using SOLID principles, MVC, Singleton, and event-driven systems with data-driven ScriptableObjects.
- Developed modular XR integration systems to convert screen-based applications into VR-ready cross-platform builds.
- Defined development standards and comprehensive documentation practices to improve onboarding and code maintainability.
- Optimized core systems for runtime stability, memory management, and rendering performance.

Scopely | *Senior Unity Developer* | Jun 2024 - Aug 2025

- Delivered a new splash screen for WWE Champions that boosted player retention by 5%+, directly impacting daily active user metrics for a high-traffic F2P mobile title.
- Built internal Unity tools for LiveOps and QA teams, improving workflow efficiency and supporting cross-functional collaboration.
- Reduced crash rates by 5% through targeted optimization and stability fixes using Unity Profiler, Android Studio, and BugSnag.
- Integrated asset bundling systems and data-driven UI rendering to improve asset delivery and user experience.

Amber Studio | *Senior Unity Developer (Contract)* | Jan 2024 - May 2024

- Engineered gameplay systems and interactive mechanics for mobile and web-based F2P casino titles on Android, iOS, and Facebook Games.
- Established the standard onboarding process for new developers, reducing ramp-up time and ensuring consistent knowledge transfer.
- Expanded in-game reward engines and real-time asynchronous messaging systems within secure, high-volume game environments.
- Integrated monetization hooks and analytics frameworks within production game systems.

PeakActivity | *Senior Unity Developer - Development Team Lead* | Oct 2022 - Jan 2024

- Led Unity development efforts delivering AR/VR applications across Quest, Magic Leap, visionOS, and WebGL platforms.
- Created an iOS AR application nominated for the Unity Awards 2021, directly securing a strategic partnership with Unity and Magic Leap.
- Developed an AR app using Magic Leap 2 showcased at AWE 2020, significantly elevating the company's profile as an XR industry leader.
- Integrated ArcGIS Maps SDK for Unity enabling real-time geospatial VR visualization; built an iOS LiDAR scanning system to capture and render point cloud data.
- Architected end-to-end cloud integrations connecting Unity client-side runtimes to backend microservices via REST APIs.

Siono (Contracted to PeakActivity) | *Unity Developer* | Jul 2020 - Sep 2022

- Developed cross-platform AR and high-performance WebGL applications for enterprise clients.
- Built interactive logical simulations and immersive VR training environments for specialized use cases.
- Delivered a WebGL-based virtual assistant framework optimized for holographic installation software.
- Maintained and documented multi-platform deployment pipelines, streamlining release cycles and production workflows.

The Capture Worlds | *Lead Unity Developer - Commercial Steam Release* | Mar 2018 - Mar 2020

- Designed and developed a procedural open-world PC game from concept through Steam release, achieving 80%+ positive user reviews and validating core gameplay systems.
- Implemented deterministic procedural generation engines for quest systems, world content spawning, and real-time AI behavior trees.
- Built custom object pooling and low-level memory allocation systems, significantly reducing runtime overhead and improving performance across target platforms.
- Managed Steam publishing, live post-launch updates, and AWS S3 cloud storage configurations.

Code Bullet | *Lead Unity Programmer* | Jan 2017 - Feb 2018

- Transformed a prototype into Landless, a survival open-world game released on Steam; directed a team of 4 to deliver scalable gameplay systems and visual assets.
- Developed autonomous AI systems using complex behavior trees and procedural open-world content spawning mechanics.
- Automated the asset pipeline, saving over \$50K in production costs; contributed to design changes that drove first-year sales exceeding \$100K.
- Optimized gameplay performance and ensured day-one launch stability through comprehensive profiling and iteration.

Stoneworks Games | *3D Artist and Junior Unity Developer (Freelance)* | Feb 2013 - Jan 2015

- Built a procedural asset combination system that scaled unique asset output from 40 to over 4,800, drastically reducing manual design time.
- Developed an NPC generation system that automated 80%+ of NPC creation used in the final game.
- Created 3D environment assets and character models; assisted in scene setup, level integration, and QA testing.

EDUCATION

Universidad Tecnológica de Salamanca - Salamanca, Gto, Mexico - Sep 2022 - Apr 2026

- Engineering in Software Development and Management (Bachelor's Level) - Completed Apr 2026 [2024 - 2026]
- A.S. in IT - Multiplatform Software Development (TSU) - Completed Aug 2024 [2022 - 2024]

Languages: Spanish (Native) - English (Fluent - Professional Proficiency)

TECHNICAL SKILLS

Game Development: Unity (3D/2D/URP), C#, ScriptableObjects, Asset Bundles, Addressables, Animation Systems, Physics Systems

Architecture and Systems: Object Pooling, Event-Driven Architecture, SOLID, Behavior Trees, Modular Design, MVC, Singleton

Procedural Systems: Procedural Generation, Algorithm Design, Runtime Content Spawning, Deterministic Systems

Platforms and XR: PC (Steam), iOS, Android, WebGL, AR Foundation, Quest, Magic Leap, visionOS

AI and Gameplay: Behavior Trees, Agent Systems, Game Mechanics, Gameplay Optimization, Performance Profiling

Tools and Production: Git, GitHub, Bitbucket, Jira, Trello, Unity Profiler, BugSnag, Steamworks, CI/CD Pipelines, Jenkins

Integration and Web: REST APIs, JSON, React, Next.js, Node.js, MongoDB, Supabase, Firebase, WhatsApp Business API

3D Pipeline: Blender, ZBrush, Maya, Substance Painter, Photoshop, Topogun, Asset Optimization
